

GDSC WEB DEV BOOTCAMP

ASSIGNMENT # 02

Portfolio using HTML, CSS

Your task is to construct a basic portfolio website by applying the HTML and CSS concepts we've discussed. Please adhere to the following instructions, and feel free to incorporate additional styling and content:

- Develop a single webpage comprising at least 4 sections/divs.
- Utilize paragraphs, images, lists and buttons using the `<a>` element.
- Refer to the attached screenshot for guidance.

Hint for making the menu, Make an unordered list, Then Apply { `display:inline;` } to li. Use `<a>` tags as content for li.

Note: Construct a single page with multiple divs/sections rather than separately. Assignment submission is mandatory to be eligible for refund/certificates.

Deadline: 24th Dec, 11:59 pm.

I'm Abu Bakar

From GDSC PIEAS

About Me

I am currently pursuing my degree in Computer Science at PIEAS in Islamabad, Pakistan. :) With a keen eye for detail and a strong passion for crafting exceptional user experiences, I am a proficient and adaptable designer/developer. My expertise spans web development, UI/UX design, and graphic design, and I hold certifications in each of these areas. I am committed to delivering solutions that seamlessly blend aesthetic and technical brilliance.
